

## ORDO XENOS INQUISITION ARMY LIST

### Forces

The Ordo Xenos Inquisition Army List uses the datasheets from the Ordo Xenos Forces section, the Imperial Navy Forces section, and the Titan Legion Forces section.

### Using The Army List

The following army list allows you to field an army based on the Ordo Xenos of the Inquisition.

Ordo Xenos formations come in two types: *Deathwatch detachments* and *Inducted Imperial Guard and Inquisitorial support formations*. Each detachment you include in the army allows you to field any one support formations. Although you can only take a support formation if you first take a detachment, they are treated as separate independent formations during a battle and do not have to move around together.

In addition, formations may be given upgrades. Each type of upgrade can only be taken once by a formation. Upgrades are added to the formation and are not a separate formation. Each upgrade that is taken adds to the cost of the formation, as shown on the upgrade chart.

Ordo Xenos armies may be supported by Imperial Navy aircraft, Titan Legion battlegroup or Deathwatch aircraft formations. A maximum of up to a third of the points available to the army may be spent on these formations.

### Special Rules

The *They Shall Know No Fear* rule applies to all Deathwatch detachment formations (see *They Shall Know No Fear*).

### SPECIAL RULE

#### *Deathwatch Transports*

The Deathwatch is a highly mobile army. Because of this, the points cost of certain formations includes enough Rhino transport vehicles to transport it and any upgrades that have been taken. Determine the number of Rhinos needed after all upgrades have been purchased. The number of Rhinos will always be the minimum needed to carry the formation, you can't take extras along to cover the loss of other transports.

Note that many formations don't receive Rhinos, usually because they can't fit into them. Formations that come with Rhinos will be noted as having "plus transport" in the units section of the army list opposite. Also note that you don't have to take Rhinos if you don't want to. If you'd rather field the formation on foot instead, so it can act as a garrison for example, or be transported in a Thunderhawk Gunship, then you may do so.

You may choose to replace a formation's Rhinos with Deathwatch Drop Pods before each game, after the opposing army is known but before objectives are placed. Formations making a planetfall via Deathwatch Drop Pods (or by another unit with that ability) may be upgraded with Corvus Blackstars, these are assumed to make planetfall alongside the infantry and do not need to be transported in another unit with *planetfall*.

### SPECIAL RULE

#### *Ordo Xenos Epic Tournament Special Rules*

Landing Craft and Thunderhawk Gunships may only transport Deathwatch detachments. They are not configured to transport inducted Imperial Guard vehicles nor are Imperial Guardsmen or Inquisitorial agents trained in the proper boarding procedures for Adeptus Astartes aircraft.

## ORDO XENOS INQUISITION ARMY LIST

Ordo Xenos armies have a strategy rating of 5. Inducted Imperial Guard and Inquisitorial support formations, and Imperial Navy aircraft formations have an initiative rating of 2+. All other formations have an initiative rating of 1+.

Deathwatch Drop Pod      Special      n/a      n/a      n/a      n/a      Deathwind

15cm      AP5+/AT5+

*Planetfall, Transport. May transport one formation of only the following units: Deathwatch Scout, Deathwatch Terminator, Deathwatch Veteran, Venerable Dreadnought. After the drop pod lands, its Deathwind attacks all enemy units within 15cm. Each enemy formation attacked receives a Blast marker for coming under fire, and an extra Blast marker for each casualty. Then any troops carried in the drop pod must disembark within 5cm of the drop pod or within 5cm of another unit from the same formation that has already landed, so long as all units are placed within 15cm of the drop pod. Drop pod models should be removed from the board once the formation they transport has disembarked. Counts as a Drop Pod for the purposes of being transported. Counts as a Drop Pod for the purposes of being transported.*

### **SPECIAL RULE**

#### *They Shall Know No Fear<sup>1</sup>*

Space Marines are renowned for their tenacity and bravery. This is represented by the following rules:

- It takes 2 Blast markers to suppress a Space Marine unit or kill a unit in a broken formation (ignore any leftover Blast markers).
- Space Marine formations are only broken if they have 2 Blast markers per unit in the formation.
- Space Marines formations only count half their number of Blaster markers in assault resolution (rounding down—note that assault resolution will not receive +1 for having no Blast markers if the formation has 1 Blast marker before rounding down). Halve the number of extra hits suffered by a Space Marine formation that loses an assault, rounding down in favour of the Space Marines.
- When a broken Space Marine formation rallies, it receives a number of Blast markers equal to the number of units, rather than half this number. Space Marines with the Leader special ability remove 2 Blast markers instead of 1.

1. They Shall Know No Fear

Q: How many Blast markers does a broken Space Marine unit count as having when working out the result of an assault?

A: One per unit.

### SPECIAL RULE

#### *Imperial Void Shields<sup>2</sup>*

Imperial Titans are protected by void shield generators. The number of void shields each Titan has is noted on the Titan's datasheet.

Each void shield will automatically stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate Blast markers. Once all of the shields have been knocked down, the Titan may be damaged normally and you may make saving throws against any hits that are scored. Hits from close combat ignore void shields but units using their firefight values must first knock down any shields before they can damage the Titan.

Void shields that have been knocked down can be repaired. Each Titan can repair one downed void shield in the end phase of each turn. In addition, if a Titan regroups it can use the dice roll to either repair the void shield or remove Blast markers (e.g., if you rolled a 2 you could repair 2 shields, remove 2 Blast markers or repair 1 shield and remove 1 Blast marker).

---

## 2. Imperial Void Shields

Q: Do void shields stop a point of damage caused by: a failed dangerous terrain test, the extra hits from the result of an assault, a Blast marker on a broken formation, or the unit ending its second withdrawal move within 15cm of the enemy?

A: No.

Q: How many void shields go down if a war engine is hit by a Titan Killer weapon that causes multiple points of damage?

A: One per each point of damage, with any left over being allocated to the unit.

Q: Can a formation regroup to repair downed void shields if it has no Blast markers?

A: Yes.

Q: If a formation with multiple units with void shields regroups is the number of repaired void shields the same for each unit or shared between them?

A: Shared between them, e.g. if you chose to repair two void shields, one unit could repair two void shields or two units could repair one void shield each.

Q: Are void shields considered when determining how many hits a war engine should be allocated?

A: No.
